SUMMARY

Backend-focused IT graduate with fintech internship experience at Intellect Design Arena (Java, Spring Boot, Oracle SQL). Built an AI affordability agent that placed in the top 14% at HackerRank Orchestrate. Dean's List, Multimedia University.

EDUCATION

Multimedia University · Cyberjaya, Malaysia 2023 – 2026

B.IT (Hons.) Information Systems — Second Class Honours (Upper Division), CGPA 3.46

Coursework: OOP & Data Structures, OS, Advanced Databases, Software Engineering, Data Science.

Indian School Darsait · Muscat, Oman 2022

High School — Computer Science with Biology

EXPERIENCE

Technology Intern — Intellect Design Arena Ltd Sep 2025 – Dec 2025

Cyberjaya, Malaysia · Java, Spring Boot, Angular, Oracle SQL

- Contributed to a **real-time bank operations monitoring dashboard** across backend and front-end, working in an Agile team with code reviews and Git (see Projects).
- Learned end-to-end payment workflows: clearing, settlement and exception handling.
- Researched and presented AI use cases for banking, covering document processing, customer support automation and agent-based workflows.

VIP Coordinator — AISSE 2025 Jan 2025

Asia International Security Summit & Expo

- Supported international VIPs and managed delegate schedules during the summit.
- Coordinated with Malaysian police liaisons.

TECHNICAL SKILLS

Languages: Java, Python, Go, C++, JavaScript, TypeScript, SQL, Dart

Backend: Spring Boot, Spring Security, JWT, JPA/Hibernate, Flyway, REST APIs, FastAPI

Databases: PostgreSQL, Oracle SQL, MySQL, Firebase Firestore

Testing & Tools: JUnit 5, Testcontainers, AssertJ, Git, GitHub, Docker, Linux, IntelliJ IDEA

Frontend & Mobile: Angular, Flutter

AI & Agents: Gemini, LangChain, LangGraph, LlamaIndex, smolagents, Hugging Face, RAG, Pinecone

PROJECTS

Bank Monitoring Dashboard (Intellect Design Arena)

Java · Spring Boot · Angular · Oracle SQL

- Built a dashboard giving bank operations teams a live view of transaction status, file-processing events and payment failures in one place, replacing manual log checks.
- Implemented Spring Boot REST APIs secured with Spring Security and JWT, with JPA/Hibernate over Oracle SQL and Flyway migrations; built the Angular front-end with filterable tables, live status and drill-downs for failed payments.
- Validated API and database behaviour with JUnit 5, AssertJ and Testcontainers integration tests.

Buy or Wait? — AI Financial Agent (HackerRank Orchestrate, Sep 2026 · **Top 14%**)

Python · Gemini

- Built an agent that decides whether a user can safely afford a purchase, and whether to pay in full, pay partially, use installments, wait, or not proceed, personalised to each user's history, commitments and payment preferences.
- Used Gemini to read messages and receipts, and a Python engine that walks a 90-day cash forecast against recurring expenses, pending payments and confirmed income, so no recommendation drops the user below their minimum balance.
- Produced the safe amount to pay today, a dated payment plan, the earliest full-payment date and the spending cuts needed, with an evaluation workflow and no hardcoded answers.

SplitSmart — Shared Expense Tracker (Final Year Project)

Flutter · Dart · Firebase

- Developed a cross-platform mobile app for tracking and settling shared group expenses, with live multi-device sync on Firebase Firestore and a settlement algorithm that minimises the transactions needed to clear balances.

HONORS & AWARDS

Dean's List Award — Multimedia University

Jun 2026

Top 14%, HackerRank Orchestrate — 24-hour hackathon

Sep 2026

Participant, STAI-2021 — Mobile App Development, Indian School Salalah

Sep 2021

Built Booksy, an eBook app, with a team of three.

Director, "Infinite Hope" — Indian School Sur

Feb 2021

Directed a short film showcased at the Indian School Film Fest 2020.

CERTIFICATIONS

Hugging Face Agents Course — Hugging Face

Sep 2026

AI Agents Fundamentals — Hugging Face

Aug 2026

Purple Fabric Engineer — Intellect Design Arena

Sep 2025

Machine Learning Foundations — AWS

Oct 2024

SEO — HubSpot Academy

Dec 2022

Python Programming (Guinness World Record Event) — HCL GUVI

May 2021

Build a Face Recognition Application using Python — HCL GUVI

Apr 2021
